PROFILE

I graduated from O.P. Jindal University with a B.Tech 🔗 in Computer Science in 2023 and have expertise in WordPress, HTML, CSS, SQL, and Basic Python. Currently, I work as a Junior Web Developer at Softvity, where I specialize in creating and managing WordPress websites. My role includes customizing themes, integrating plugins, and collaborating with my team to build user-friendly, visually appealing, and high-performance websites for a variety of businesses.

PROFESSIONAL EXPERIENCE

Junior Web Developer present
Softvity 🔗 Cuttuck, India
At Softvity, I work as a Junior Web Developer and have learned the basics of WordPress. My main job is to create websites for different clients, making sure each website fits their specific needs. This role has given me practical experience in web development and improved my skills in designing websites that provide effective solutions.

ORGANIZATIONS

Technorollix
Event Manager
When I was in my 2nd year, I was an Event Manager in Technorollix and organized managed and distributed work to make the event successful as well as anchored to make the people gain knowledge about research paper.

TechDebate

Event Organizer

In TechDebate, I with my four Friends made this event successful by organizing the event. Many of the participants participated and gained knowledge about their subjects more but in a fun way . As it had 4 rounds, first was of normal quiz question about logical and reasoning, second was of subjects studied in college, third was of basic programming language.

PROJECTS

Construction-Site 🔗

This is a basic construction project made for people who are looking for designs and places for construction. It shows a variety of catalogs of designs. Link - rubichoudhary.github.io/Construction-site Languages - HTML || CSS I have made this project while learning HTML, CSS and little bit Bootstrap. I learned making navbar and adding logo with suitable margin and padding and after that adding photos. Learning and making use of div was adventures for me. Lastly adding form for the contact purpose and footer for the signature.

Dashboard Module

This was my 3rd year Project in college. There were 4 members in my project. And my part was in Frontend role, My contribution was to make the website design and coloring that fits the website to be unique as well as made 6 pages for the frontend part. I had made the navbar in Header and footer for the whole site. Home page, Blog, About Us , Contact Us. And other members done the Backend Part and I had made my part with HTML, CSS. After Completing my part I also helped my friend my making lab manual.
